

DT-500W

AM / FM / Weather Alert Pocket Radio

Color

BLACK

The pocket sized Sangean DT-500W has about everything you could want from a pocket AM / FM / WX radio. In addition to AM Auto Tracking that will give you better reception, it also receives all 7 NOAA Weather Alert Emergency Channels that sounds a very loud siren when an extreme weather condition is imminent, or any type of public awareness becomes critical. Even with your radio off or you are listening to another radio station the weather alert continues to monitor the NOAA channels should an emergency arise.

Sensitivity is remarkable with Sangeans AM Auto Tracking

AM Auto Tracking will automatically optimize the sensitivity of the AM station you're tuned to and helps to find the distant and hard to get stations. You'll hear all your favorite AM stations with crystal clear sound thanks to this great feature.

The large backlit LCD display clearly shows the time, station, battery life, alert indication and all other pertinent information. 25 preset (10 AM, 10 FM, 5 WX) selections lets you mix AM / FM stations with immediate access through the "My Favorites" button. Other features include a Lock Switch to prevent accidental set-up changes, 90 minute auto shutoff, built-in speaker and auto station seek.

The Sangean DT-500W is the last pocket radio you will ever need to buy. It has about everything you could want, and then some, in a small, pocket size radio.
